DECANTUS™

A Unique By-The-Glass Wine Decanting System

The Decantus™ is designed after the ancient vessel used to carry wine and olive oil in the Roman and Greek times of 3,000 years ago - Amphora.

IMPROVEMENTS OVER OTHER AERATORS

1. More Aeration of Wine (extra long capillary tubes).
2. Tubes at angle, so no wine drips from side holes.
3. Bigger opening at top allows for easier pouring. (6.5cm vs. 3.4cm)
4. Wine flows down faster because of Vertical Planar insert (eliminates whirlpooling).
5. Easier to hold. Handles with Decantus™ Deluxe and good gripping point with Decantus™ Slim. Easier to hold, easier to handle. Both versions weigh less than Vinturi.
6. A sturdy upright position on the table with the large rubber base.
7. Base itself has a large capacity to hold wine drippings.
8. Cleaning brush for cleaning the lower tube included in all versions.
9. Stainless Steel sediment screen included with Decantus™ Classic and Connoisseur Sets.
10. Decantus™ Wine Aerator Stand is an easy, hands-free platform for pouring wine through the Decantus™ Aerator. Protective plastic tubing on the top ring prevents scratching of the Decantus™.
11. Best Value and Price in Wine Aerators.
12. Developed by Franmara, a company in the wine accessories business for 40 years.
13. No defects or fold lines mar the surface of Decantus™.
14. Better in design, better in appearance than other aerators.
15. The solid food grade (MS) thermoplastic provides excellent clarity and does not retain any aroma from pouring through it.
16. The Decantus™ Wine Aerator was specifically designed to aerate wine only. Do not use with whiskey, scotch, rum, brandy or other beverages with high alcohol content. Wash the Decantus™ by hand, do not put in the dishwasher.

Decantus Deluxe

DECANTUS™

**A UNIQUE, BY-THE-GLASS
WINE DECANTING SYSTEM**

*Get greater Value and
Enjoyment from your next
bottle of wine with DECANTUS™.*

**Wine needs to react with air to
reveal its fullest flavor and bouquet.**

The DECANTUS™ utilizes the Bernoulli (a Swiss scientist) effect where the reduced pressure of a stream of fluid (wine) draws an air flow through diagonal thin tubes inside the DECANTUS™. The wider opening on top and larger liquid capacity of the top reservoir bowl makes pouring into DECANTUS™ much easier than with the Vinturi. Wine travels faster through the DECANTUS™ without a whirlpool effect, because of the vertical planar insert. Reduces free sulphites an average of 56%* (see www.decantus.net). The "froth" from DECANTUS™ has finer bubbles giving smoother aeration than any other aerator on the market.
